CLAIMS

5   1.   A method for merging data, the method comprising the steps of:

receiving input data for merging;

defining one or more transformations of the input data;

defining a partition of the input data;

applying admissible geometrization to the one or more transforms of the

10   input data and the partition of the input data;

producing at least an admissible transformation of the input data; and

merging the input data using at least the admissible transformation of the

input data.
